**Illinois Property Tax Statistics Order Form****203**

# Introduction

---

This book details equalized assessed valuation (EAV), tax rates, extensions, collections, PTELL dollar reductions, and other information, either statewide or by county. The figures reported are for the 1999 tax year, taxes payable in 2000, unless specified otherwise. Data submitted to the department by county clerks and treasurers is the primary source for all of the tables. The department has published the statistics book annually since 1963.

The property tax is based on the value of real property owned. These taxes help finance the services provided by local government, with the largest share going to school districts.

The property tax cycle extends over two years. The tax year is the year of assessment and reflects the value of property as of January 1. Tax bills are paid in the year following the tax year. Property taxes are collected in two installments, generally in June and September. In Cook County, the first installment is due March 1, and the second, normally about August 1. The tax bills for 1999 assessments were mailed in 2000.

In most of Illinois, real property is reviewed and reassessed every four years. Between these general assessments, any property whose condition has significantly changed or that is incorrectly assessed is subject to reassessment. In "township" counties, the township is the assessment unit. In Cook County, assessments are done at the county level. In "commission" counties, there is no township government and property assessment is performed at the county level. The last general assessment was in 1998 for commission counties, and in 1999 for township counties, except the counties that are divided into assessment districts.

A county board may, by resolution, divide the county into four assessment districts. In these counties, one district is reassessed each year on a rotating basis. In 1999, counties divided into four assessment districts included Christian, Clark, Crawford, Edgar, Effingham, Jo Daviess, Lake, Madison, Massac, Menard, Monroe, Pulaski, and Tazewell. Cook County is divided into 3 assessment districts, each of which is reassessed every 3 years.

Farmland is revalued every year.

Once boards of review complete their adjustments and finalize assessments, the department certifies an equalization factor to the county, and taxes are extended by the county clerk. Tax rates are computed by dividing the levy for each fund in a particular taxing district by the EAV of the district. If the computed rate is higher than the applicable maximum tax rate limit, then the maximum statutory rate is applied. The rates may be further reduced in districts affected by the Property Tax Extension Limitation Law (PTELL).

# Definitions

---

## **Assessment**

---

The value placed on property for tax purposes and the basis for determining what portion of the overall tax burden each property owner will bear. Assessment may also be referred to as valuation or assessed value. An assessment involves identifying the real property within a jurisdiction and placing a value for it on the tax rolls.

## **Chief County Assessment Officer (CCAO)**

---

A Chief County Assessment Officer (CCAO) is an individual appointed by a county board, or elected in a county, to supervise township and multi-township assessors in completing original assessments and to review their work. In some counties, the title of “supervisor of assessments” is used, rather than CCAO. In Cook and St. Clair counties, the title used is “county assessor.” The CCAO has the power to revise and equalize assessments and is the clerk of the board of review. In commission counties, the CCAO makes the original assessment.

## **Collar counties**

---

The five suburban counties of DuPage, Kane, Lake, McHenry, and Will, that are contiguous to Cook County.

## **Collections**

---

The net amount of money received from property taxes and distributed to taxing districts, after removing charges against collections, such as delinquent taxes and certificates of error.

## **Effective tax rate**

---

The ratio of taxes billed to the market value, generally expressed as a percentage.

## **Equalization**

---

The process of providing a uniform average level of assessment. This application of a uniform percentage increase or decrease to assessed values on various geographic areas or classes of property brings assessment levels, on average, to a uniform level of the market value.

## **Equalization factor (multiplier)**

---

The state equalization factor that is applied to each parcel of property in a county to increase or decrease the level of assessment to the mandated statutory level of 33 1/3 percent of the market value. Intra-county factors may be used by a county to bring all property to a uniform level. Factors are also referred to as multipliers.

## **Equalized assessed value (EAV)**

---

The equalized assessed value, or EAV, is the result of applying the state equalization factor to the assessed value of a parcel of property. Tax bills are calculated by multiplying the EAV by the tax rate.

## **Exemption**

---

The removal of property from the tax base. An exemption may only be for a portion of the EAV, such as a homestead exemption, or for the complete amount of the EAV, such as a church building used exclusively for religious purposes.

### **Extension**

---

The actual dollar amount of tax billed to property taxpayers in a taxing district. The sum may differ from the levy due to the tax rate limits or other factors.

### **Levy**

---

The amount of money sought from property taxes by a taxing district. The governing board of each taxing district determines the total amount of money it needs to operate during the coming year and how much of that sum must be raised from property taxes. Each taxing district adopts a property tax levy ordinance, or resolution, which is filed with the county clerk.

### **Tax rate**

---

The amount of tax due, stated in terms of a percentage of the tax base. This percentage is derived by dividing the levy for a fund by the EAV for the taxing district. Some funds have a maximum statutory tax rate that may not be exceeded. The sum of the fund rates equals the total district rate.

### **Tax year**

---

This term refers to the year of assessment. Tax year 1999 refers to assessments based on property values as of January 1, 1999; 1999 taxes were payable in calendar year 2000. Unless otherwise specified, any year reported in this book refers to the tax year.

# The Department of Revenue's Role

---

Although property tax is a local tax, the department has the statutory duty and responsibility to direct and supervise the local assessment process. The department's Local Government Services Bureau is involved with many aspects of the local administration of property tax. The department provides technical assistance, maintains taxing district maps, approves non-homestead exemptions, equalizes assessments between counties, administers the personal property replacement tax, and assesses certain types of property. In addition, the department publishes appraisal and assessment manuals, performs complex commercial and industrial appraisals at assessors' requests, and conducts training programs for assessors and board of review members.

## Approval of exemptions

---

The department must approve non-homestead exemption applications forwarded by county boards of review, who can only make a recommendation for disposition.

## Equalization

---

The department is responsible for equalizing the average level of assessment among all counties in the state. This equalization is necessary to

- equitably distribute the tax burden in districts which lie in more than one county,
- provide a fair basis for the distribution of some state grants-in-aid,
- apply the tax rate and bond indebtedness limitations to local governments, and
- maintain the statutory 33 1/3 percent assessment level.

The department's annual sales ratio studies provide the foundation for inter-county equalization, by comparing assessed values and sales prices. The equalization factors, annually certified to each county, are used to adjust assessments to bring county assessment levels to the statutory standard level. Taxes are then extended on each parcel's EAV.

## Farmland

---

Farms have been assessed according to "agricultural economic value," the ability of the farm to produce income, since 1981. A tract of land must have been used for agricultural purposes for the two preceding years to be eligible for assessment as a farm. Farm buildings are assessed at one-third of their respective contributions to the farm's productivity. Farm homesites and dwellings are assessed at one-third of the market value.

## Illinois Personal Property Tax Replacement Income Tax

---

The Illinois Constitution of 1970 required the abolition by January 1, 1979, of personal property tax in Illinois. To replace the revenue from the personal property tax, the General Assembly enacted state replacement taxes on income and invested capital. Funds collected from these taxes are deposited into the Personal Property Replacement Tax Fund and distributed to taxing districts. The department certifies each taxing district's share of the replacement revenues. Approximately 6,600 taxing districts receive payments eight times per year.

### State-assessed property

---

The department is also responsible for the assessment of railroad operating property and pollution-control facilities. The department certifies these assessments to county officials for inclusion in the local tax base. Taxes on these properties are collected and spent locally.

### Taxing district maps

---

The department uses the Geographic Information System (GIS), to prepare and maintain taxing district maps for all counties in the state. These maps outline boundaries of counties, political townships, municipalities, and taxing districts, such as park districts, school districts, sanitary districts, community college districts and fire protection districts. The maps also detail major rivers, lakes, and railroads.

### General information

---

For a comprehensive guide to the property tax system, see the *Illinois Property Tax System*. This free publication may be obtained by writing to "Illinois Department of Revenue, Local Government Services Bureau, P.O. Box 19033, Springfield, Illinois 62702-9033," or by calling 217 782-3254.

Specific property tax information for a district or group of districts is available. Please send your request to the address and telephone number listed above.

To receive the next edition of the Illinois Property Tax Statistics, complete and return the order form found on the last page of this book. This document will also be available on the department's web site at [www.Iltax.com](http://www.Iltax.com).

# Tax Relief and Incentive Programs

---

*The relief and incentive programs described in this section are current law as of the date this document was published. Statistics presented in this publication are calculated using the provisions of the law in effect during the year for which the statistics are reported.*

## **Homestead exemptions**

---

Currently, five types of exemptions are available.

**General Homestead Exemption.** This exemption is available to residential property that is occupied as the principal dwelling place by the owner or a lessee with an ownership interest. The amount of exemption is the increase in the current year's EAV, above the 1977 EAV, up to a maximum of \$3,500. The exemption for Cook County is limited to a maximum of \$4,500.

**Senior Citizens Homestead Exemption.** This is a \$2,000 reduction in the EAV of real property that a person 65 years of age or over is obligated to pay taxes on and, owns and occupies, or leases and occupies as a residence. The exemption is \$2,500 in Cook County. This exemption is in addition to the General Homestead Exemption.

**Homestead Improvement Exemption.** This exemption is limited to the fair cash value that was added to the homestead property by any new improvement, up to an annual maximum of \$45,000. The exemption continues for up to four years from the date the improvement is completed and occupied.

**Disabled Veterans' Exemption.** This exempts up to \$58,000 (\$50,000 prior to January 1, 2000) of the assessed value for certain types of housing owned and used by disabled veterans. The Illinois Department of Veterans' Affairs determines the eligibility for this exemption, which must be reestablished annually.

**Senior Citizens Assessment Freeze Homestead Exemption.** This exemption allows qualified seniors, who are 65 years of age or older, and have a household income of \$40,000 or less, (\$35,000 prior to January 1, 1999) to elect to maintain the EAVs of their homes at the base year values and prevent any increase due to inflation. This exemption must be applied for annually on Form PTAX-340.

## **General authority tax abatements**

---

The following general authority abatements are available from local taxing districts under 35 ILCS 200/18-165:

In general, the commercial and industrial abatement applies to the property of any commercial or industrial firm, including, but not limited to, the property of any firm that is used

- in collecting, separating, storing, or processing recyclable materials.
- for the generation and transmission of electricity locating within the district or expanding within the district in the previous year by building a new generating facility using natural gas.
- for production operations at a new, expanded, or reopened coal mine within the district that has been certified as a High Impact Business by the Department of Commerce and Community Affairs.

The abatement shall not exceed 10 years or a total abatement for all years for all districts of \$4,000,000.

Through January 1, 2010, qualifying new electric-generating facilities may also receive an abatement, which is graduated based on the property's EAV.

Some horse racing and auto racing facilities also receive limited abatements that cannot exceed 10 years.

Certain academic and research institutes, exempt under Section 501(c) of the Internal Revenue Code (IRC), receive limited abatements that cannot exceed \$5 million of abated taxes for all taxing districts combined, and must be for a period of at least 15 years.

Housing for older persons, provided under any state or federal program, and determined by the Department of Human Rights to meet specific criteria to assist elderly persons, is another abatement that cannot exceed \$3 million of abated taxes for all taxing districts combined over a 15-year period.

Effective for assessment years 1998 through 2003, properties of historical societies exempt under Section 501(c)(3) of the IRC also qualify for abatement.

Property used for a municipal airport that is subject to a leasehold assessment which is sublet from a park district that is leasing the property from a municipality that is used exclusively for recreational facilities or for parking lots used exclusively for those facilities may receive a 10-year abatement.

Property belonging to an eligible business that is used as a corporate headquarters do not receive an abatement *per se*; instead they receive annual payments from the taxing district not to exceed the property taxes paid directly or indirectly by the eligible business. The term of this "abatement" cannot exceed 20 years.

### **Enterprise zones and tax abatement**

---

The Enterprise Zone Act authorizes the Department of Commerce and Community Affairs to certify a limited number of enterprise zones. State income, sales, and property tax incentives are all associated with the zones to encourage business investment. Each taxing district has the authority to abate property tax on new improvements or renovation or rehabilitation of existing improvements for any class of property in the Enterprise Zone, as provided in 35 ILCS 200/18-170. The abatement is limited to the term of the zone.

### **Truth-in-Taxation Act**

---

This act, provided for by 35 ILCS 200/18-55 *et seq.*, requires any taxing district levying more than 105 percent of its prior year extension to publish a notice in the newspaper and hold a public hearing concerning the proposed levy increase. If the provisions of the act are not met, the county clerk may not extend an amount greater than 105 percent of the prior year's extension.

### **Tax increment financing**

---

Tax increment financing (TIF) is a financing tool used to redevelop blighted areas and create economic recovery. The six types of property tax TIFs are explained below.

**Tax Increment Allocation Redevelopment Act.** This act, provided for by 65 ILCS 5/11-74.4-1 *et seq.*, allows Illinois municipalities to designate some areas, *i.e.*, residential neighborhoods, commercial business districts, or industrial areas, as redevelopment areas and create a TIF district. The tax revenue, derived from the assessment increases in the project area, is used to pay for the public investments made in the TIF area and certain costs to the developer. The TIF district is dissolved once all redevelopment costs are paid or at the end of 23 years, whichever comes first, although some have been extended to 35 years.

**Economic Development Area Tax Increment Allocation Act.** This act, provided for by 20 ILCS 620/1 *et seq.*, encourages commerce and industry on sites of at least 320 acres. The guidelines include creating and maintaining no less than 2,000 jobs, and the private investment of at least \$100 million. These areas are certified by the Department of Commerce and Community Affairs and are limited in number.

**County Economic Development Project Area Property Tax Allocation Act.** This act, provided for by 55 ILCS 85/1 *et seq.*, allows for a rebate to any developer or nongovernment person of taxes generated from the increase in the tax base of the project area, if the TIF area is located in an enterprise zone. The act applies only to counties that are adjacent to the

Mississippi River, with 200,000 to 300,000 inhabitants. Other guidelines include creating or retaining no less than 1,000 jobs, and the private investment of at least \$50 million. These are also certified by the Department of Commerce and Community Affairs.

**County Economic Development Project Area Tax Increment Allocation Act.** This act, provided for by 55 ILCS 90/1 *et seq.*, limits the number of areas that could be created to the first 20 months of its inception. The act allows for a rebate to any developer or nongovernment person of taxes generated from the increase in the tax base of the project area, if the TIF is located in an enterprise zone. The area must cover an aggregate of 5,000 acres and the county unemployment rate cannot be less than 12 percent. The guidelines also include creating or retaining 1,000 jobs, and the private investment of at least \$100 million.

**Industrial Jobs Recovery Law.** This law, provided for by 65 ILCS 5/11-74.6-1 *et seq.*, allows municipalities that meet certain site conditions, *i.e.*, unemployment, declining EAV, vacant industrial buildings, or environmental contamination, to create TIF districts. If no project is initiated within five years, the municipality may adopt an ordinance repealing this designation.

**Economic Development Project Area Tax Increment Allocation Act of 1995.** This act, provided for by 65 ILCS 110/1 *et seq.*, allows municipalities to establish tax increment financing redevelopment areas for all or part of closed military installations located within their boundaries.

**Senior Citizens Real Estate Tax Deferral Act**

This act, provided for by 320 ILCS 30/1 *et seq.*, establishes a program for people who are 65 years of age or older, and who meet other prescribed income criteria, to defer all or part of their real estate taxes or special assessments. It is administered by the county treasurers' offices. Participants must reapply for each year they wish to defer their real estate taxes or special assessments.

| Tax year | Participants | Amounts deferred and lien fees | Tax year | Participants | Amounts deferred and lien fees |
|----------|--------------|--------------------------------|----------|--------------|--------------------------------|
| 1999     | 1,749        | 3,630,671                      | 1991     | 441          | 794,704                        |
| 1998     | 1,771        | 3,712,352                      | 1990     | 328          | 539,534                        |

**Circuit Breaker Property Tax Relief Program**

The "Circuit Breaker" property tax relief program, provided for by 320 ILCS 25/1 *et seq.*, was initiated in 1972 by the Senior Citizens and Disabled Persons Property Tax Relief and Pharmaceutical Assistance Act. The intent was to protect the assets of low-income senior and disabled residents who could least afford the burden of property taxes, both for the taxes they paid directly and for those they paid indirectly through rent or nursing home charges. The program has undergone many changes since its initial inception. The most recent changes, which became effective January 1, 2001, include income level increases and the addition of qualified additional residents who meet certain qualifications. In order to qualify, a person must be 65 years of age or older, or 16 years of age or older and totally disabled, or be a widow or widower who was 63 or 64 years of age before the spouse's death if both were eligible. In addition, applicants must meet other prescribed income criteria and must file Form IL-1363, Application for Circuit Breaker and Pharmaceutical Assistance, each year.

The department administers the program and processed a total of 206,540 property tax grants during the 1999 calendar year, totaling more than \$51.7 million in grants.

# Property Tax Extension Limitation Law (PTELL)

## Limitation history

|      |               |
|------|---------------|
| 1991 | 5.0 percent*  |
| 1992 | 3.1 percent   |
| 1993 | 2.9 percent   |
| 1994 | 2.7 percent** |
| 1995 | 2.7 percent   |
| 1996 | 2.5 percent   |
| 1997 | 3.3 percent   |
| 1998 | 1.7 percent   |
| 1999 | 1.6 percent   |
| 2000 | 2.7 percent   |
| 2001 | 3.4 percent   |

\* The change in CPI was 6.1 percent.

\*\* For Cook County, the limitation for 1994 was 5.0 percent as specified by the "One-Year Property Tax Extension Limitation Law." See Section 18-246 *et seq.* of the Property Tax Code.

The Property Tax Extension Limitation Law (PTELL), was enacted to limit the annual increases in property tax extensions (total taxes billed) for non-home rule taxing districts. Increases in property tax extensions are limited to the lesser of five percent or the increase in the consumer price index (CPI), for the year preceding the levy year. The CPI increase for 1999 was 1.6%. The limitation for a taxing body can be increased with voter approval.

Although the law is commonly referred to as "tax caps," use of this phrase can be misleading. The PTELL does not "cap" either individual property tax bills or individual property assessments. Individual tax bills may still increase or decrease. PTELL only limits increases in taxing districts' extensions. The PTELL allows a taxing district to receive a limited inflationary increase in tax extensions on existing property, plus an additional amount for new construction, and voter-approved rate increases.

The limitation slows the growth of revenues to taxing districts when property values and assessments are increasing faster than the rate of inflation. In addition, local taxing districts are able to capture the increased EAV that is the result of new construction. As a whole, property owners have some protection from tax bills that increase only because the market value of their property is rising rapidly.

Payments for bonds issued without voter approval are subject to strict limitations.

If a taxing district determines that it needs more money than is allowed under the PTELL, it can ask the voters to approve an increase.

The PTELL was originally passed in 1991 and affected taxing districts in the "collar counties" (*i.e.*, DuPage, Kane, Lake, McHenry, and Will). Cook County taxing districts were added next. Beginning in 1996, taxing districts in all other counties in Illinois may be affected if county referenda are approved by the voters. Only non-home rule taxing districts are subject to the PTELL.

The following districts are subject to the PTELL:

- Non-home rule taxing districts with a majority of their 1990 EAV in DuPage, Kane, Lake, McHenry, or Will counties;
- Non-home rule taxing districts with a majority of their 1994 EAV in Cook and the collar counties that were not subject to the PTELL before 1995;
- Non-home rule taxing districts in other counties if every county in which the district is located has held a referendum asking if voters want the PTELL to be applicable, and if the majority of the EAV of the district is in counties where voters have approved the referendum;
- Non-home rule taxing districts with part of their EAV in Cook or the collar counties if every other county in which the district is located has held a referendum asking if voters want the PTELL to be applicable, and if the majority of the EAV in the district is in counties where voters have approved the referendum and in Cook and the collar counties.

The following list shows the first year that counties were affected by PTELL:

|      |  |
|------|--|
| 1991 | DuPage, Kane, Lake, McHenry, and Will  |
| 1995 | Cook   |
| 1997 | Boone, Champaign, Christian, Franklin, Jackson, Kankakee, Lee, Logan, Macoupin, Menard, Monroe, Morgan, Randolph, Sangamon, Schuyler, Union, Williamson, and Winnebago |
| 1998 | JoDaviess, Kendall, LaSalle, McDonough, and Stephenson   |
| 1999 | DeKalb, Jefferson, Marion, Shelby, Tazewell, and Washington  |

The chart on the opposite page illustrates the effect of PTELL.

## 1999 PTELL Dollar Reduction

# Cook County Real Property Classifications

---

Cook County classifies real property for the purpose of taxation. In 1974, the Cook County Board passed an ordinance establishing assessment classes and the percentage of market value at which each class is to be assessed. This ordinance, amended previously, was again amended and approved on December 6, 1994. The newest amendment created 11 classes, previously 9. These classes are assessed at the following percentages of market value.

|                 |     |                 |     |                 |     |                 |     |
|-----------------|-----|-----------------|-----|-----------------|-----|-----------------|-----|
| <b>Class 1</b>  | 22% | <b>Class 2</b>  | 16% | <b>Class 3</b>  | 33% | <b>Class 4</b>  | 30% |
| <b>Class 5a</b> | 38% | <b>Class 5b</b> | 36% | <b>Class 6b</b> | 16% | <b>Class 7a</b> | 16% |
| <b>Class 7b</b> | 16% | <b>Class 8</b>  | 16% | <b>Class 9</b>  | 16% |                 |     |

## Descriptions of major classes used in Cook County, per December 6, 1994, approved amendment

---

**Class 1** Unimproved real estate.

**Class 2** Real estate used as a farm, or real estate used for residential purposes when improved with a house, an apartment building of not more than six living units, or residential condominium, a residential cooperative, or a government- subsidized housing project, if required by statute to be assessed in the lowest assessment category.

Real estate improved with a single room occupancy building, provided 1) that at least one-third of the single room occupancy units are leased at no more than 80 percent of the current "Fair Market Rent Schedule for Existing Housing for Single Room Occupancy units as set by the U.S. Department of Housing and Urban Development," (FMR schedule); 2) that no single room occupancy units are leased at rents in excess of 100 percent of the current FMR schedule; 3) that the overall maximum average rent per unit for all single room occupancy units in the building shall not exceed 90 percent of the current FMR schedule; and 4) that the property is in substantial compliance with all local building, safety and health codes and requirements. In the event that the owner fails to comply with these requirements, the Class 2 classification is revoked.

**Class 3** All improved real estate used for residential purposes which is not included in Class 2 or Class 9, including a single room occupancy building.

**Class 4** Real estate owned and used by a not-for-profit corporation in furtherance of the purposes set forth in its charter, unless used for residential purposes. If the real estate is used for residential purposes, it is classified in the appropriate residential class.

**Class 5a** All real estate not included in Class 1, 2, 3, 4, 5b, 6b, 7a, 7b, 8, or 9 of this section.

**Class 5b** All real estate used for industrial purposes and not included in any other class.

**Class 6b** Real estate used primarily for industrial purposes, consisting of all newly constructed buildings or other structures, including the land upon which they are situated; or abandoned property, including the land upon which the property is situated; or all buildings and other structures which are substantially rehabilitated to the extent such rehabilitation has added to their value, including qualified land related to the rehabilitation. Land qualifies when the rehabilitation adds vertical or horizontal square footage to the improvements. The amount of land eligible for the incentive must be in such proportion as the square footage added by the rehabilitation bears to the total square footage of the improvements on the parcel.

Prior to filing a Class 6b eligibility application with the assessor, an applicant must obtain from the municipality in which the real estate is located or, the board of commissioners of Cook County, if the real estate is located in an unincorporated area, an ordinance or resolution expressly stating that the municipality or county board, as the case may be, has determined that the incentive provided by Class 6b is necessary for

development to occur on that specific real estate and that the municipality or county board, as the case may be, supports and consents to the Class 6b application to the assessor. A certified copy of the ordinance or resolution must be included with the Class 6b eligibility application at the time of filing the application with the assessor.

The classification continues for a period of 10 years from the date the new construction (excluding demolition, if any), or substantial rehabilitation was completed and initially assessed, or in the case of abandoned property, from the date of substantial reoccupancy. After this 10-year period, the real estate reverts to the applicable classification under this ordinance.

Additionally, for newly constructed or substantially rehabilitated buildings and other structures to qualify for Class 6b classification, an eligibility application must be made to the assessor within one year prior to the beginning of such new construction or substantial rehabilitation. With respect to abandoned property, the eligibility application must be made to the assessor no later than 90 days after purchase for value if such property is encompassed within the definition of abandoned property by reason of purchase for value; or within one year prior to the beginning of substantial rehabilitation if such property is encompassed within that definition by reason of substantial rehabilitation.

The assessor may adopt rules consistent with the foregoing necessary to ensure proper review of all factors relevant to determine eligibility for the benefits provided under Class 6b.

The assessor shall provide by rule for the filing of triennial reassessment reports by all Class 6b recipients as to the use of the property and the number of persons employed at the Class 6b site. The reports must be verified. Failure to file these reports within the time established by the assessor's rules will result in loss of the incentive for the period relating to the nonfiling.

**Class 7a** Real estate used primarily for commercial purposes, comprising a qualified commercial development project, located in an "area in need of commercial development," where total development costs, exclusive of land, do not exceed \$2 million, consisting of all newly constructed buildings or other structures, including the land upon which they are situated; or abandoned property, including the land upon which such property is situated; or all buildings and other structures which are substantially rehabilitated to the extent such rehabilitation has added to their value, including qualified land related to the rehabilitation. Land qualifies when the rehabilitation adds vertical or horizontal square footage to the improvements. The amount of land eligible for the incentive must be in such proportion as the square footage added by the rehabilitation bears to the total square footage of the improvements on the parcel.

This classification continues for a period of 10 years from the date the new construction (excluding demolition, if any) or such substantial rehabilitation was completed and initially assessed, or in the case of abandoned property, from the date of substantial reoccupancy. After the 10-year period, the real estate reverts to the applicable classification under this ordinance.

The assessor shall provide by rule for the filing of triennial reassessment reports by all Class 7a recipients as to the use of the property and the number of persons employed at the Class 7a site. The reports must be verified. Failure to file these reports within the time established by the assessor's rules will result in loss of the incentive for the period relating to the nonfiling.

**Class 7b** Real estate used primarily for commercial purposes, comprising of a qualified commercial development project, located in an “area in need of commercial development,” where total development costs, exclusive of land, exceed \$2 million, consisting of all newly constructed buildings or other structures, including the land upon which they are situated; or abandoned property, including the land upon which such property is situated; or all buildings and other structures which are substantially rehabilitated to the extent such rehabilitation has added to their value, including qualified land related to the rehabilitation. Land qualifies when the rehabilitation adds vertical or horizontal square footage to the improvements. The amount of land eligible for the incentive must be in such proportion as the square footage added by the rehabilitation bears to the total square footage of the improvements on the parcel.

This classification continues for a period of 10 years from the date the new construction (excluding demolition, if any) or such substantial rehabilitation was completed and initially assessed, or in the case of abandoned property, from the date of substantial reoccupancy. After the 10-year period, the real estate reverts to the applicable classification under this ordinance.

The assessor shall provide by rule for the filing of triennial reassessment reports by all Class 7b recipients as to the use of the property and the number of persons employed at the Class 7b site. The reports must be verified. Failure to file these reports within the time established by the assessor’s rules will result in loss of the incentive for the period relating to the nonfiling.

**Class 8** Real estate used primarily for industrial or commercial purposes consisting of all newly constructed buildings or other structures, including the land upon which they are situated, or abandoned property, including the land upon which such property is situated; or all buildings and other structures which are substantially rehabilitated to the extent such rehabilitation has added to their value, including qualified land related to the rehabilitation. Land qualifies when the rehabilitation adds vertical or horizontal square footage to the improvements. The amount of land eligible for the incentive must be in such proportion as the square footage added by the rehabilitation bears to the total square footage of the improvements on the parcel. Such real estate must be located in an area which has been certified as severely blighted and the municipality in which the real estate is located or, if in an unincorporated area, the county has by lawful resolution determined that the real estate is consistent with an overall plan for the rehabilitation of the area.

The classification continues for a period of 12 years from the date the new construction (excluding demolition, if any) or substantial rehabilitation was completed and initially assessed, or in the case of abandoned property, from the date of substantial reoccupancy. After the 12-year period, the real estate reverts to the applicable classification under this ordinance.

The assessor may adopt rules necessary to ensure proper review of the application, supporting data, and all other pertinent factors. The certification of an area as severely blighted expires five years from the date the certification is granted. The certification may be extended for one additional five-year period upon reapplication by the appropriate local governing body within the period from one year to six months prior to the expiration of the initial five-year period.

The assessor shall provide by rule for the filing of triennial reassessment reports by all Class 8 recipients as to the use of the property and the number of persons employed at the Class 8 site. The reports must be verified. Failure to file these reports within the time established by the assessor’s rules will result in loss of the incentive for the period relating to the nonfiling.

**Class 9** All real estate otherwise entitled to Class 3 classification, provided that such real estate, consisting of land and existing buildings and structures: 1) is multifamily residential real estate, 2) has undergone major rehabilitation, 3) is located in a targeted area, or in an Empowerment Zone or Enterprise Community, as proposed and approved by the Cook County Board of Commissioners on June 22, 1994, or the Chicago City Council on May 18, 1994, 4) has at least 50 percent of the dwelling units leased at rents affordable to low or moderate-income persons or households, and 5) is in substantial compliance with all applicable local building, safety and health requirements and codes.

To qualify for the Class 9 classification, the applicant must: 1) file an eligibility application with the assessor prior to the beginning of rehabilitation, 2) undertake and complete a major rehabilitation of the property, 3) maintain the property in substantial compliance with all local building, safety and health codes and requirements for the duration of the Class 9 classification period, 4) lease, for the duration of the Class 9 classification period, at least 50 percent of the dwelling units of the property to tenants at rents which will not exceed rents affordable to low and moderate-income persons or households, and 5) file annually with the assessor, during the period prescribed by the assessor, for the duration of the Class 9 classification period, a sworn statement verifying continuous compliance with the Class 9 provisions of the ordinance. No applicant shall discriminate on the basis of race, color, sex, marital status, religion, national origin or ancestry, or on any other basis prohibited under federal, state, or local law.

Upon completion of the major rehabilitation, the applicant must supplement the application by submitting evidence showing that major rehabilitation did, in fact, occur, the date that the major rehabilitation was completed, and that the real estate complies with all applicable local building, safety and health requirements and codes.

Beginning January 1, 1995, Class 9 classification will have an initial duration of 10 years from the date the major rehabilitation was completed, and may, upon application to the assessor within the period from 18 months to 12 months prior to the expiration of the Class 9 classification period, be extended for a further 10-year period. Upon application to the assessor within the period from 18 months to 12 months prior to the expiration of the first extension of the Class 9 classification period, the Class 9 classification may be extended for a further 10-year period. No further extensions of Class 9 classification will be allowed thereafter. All 8-year duration Class 9 classifications in effect on January 1, 1995, are extended to a 10-year period unless the property owner has filed a Notice of Termination with the assessor within a period from 18 months to 12 months prior to the expiration of the current Class 9 classification period. No extensions of Class 9 classification will be granted unless the assessor determines that 1) the building remains in compliance with the affordable rent requirements, and 2) the building remains in substantial compliance with all applicable local building, safety and health requirements and codes. After this period, the real estate reverts to the applicable classification under this ordinance.

When the Class 9 classification is due to expire or is terminated by action of the owner or the assessor, the property owner must, in a manner and form determined by the assessor, notify all Class 9 tenants of the date of the termination of Class 9 classification.

# Measures of Assessment Uniformity

---

The tables on the following two pages present the two measures of assessment uniformity: the coefficient of dispersion (COD) and the coefficient of concentration (COC), and report the median level of assessment. All figures on these two pages are compiled from the annual sales ratio studies the department prepares, comparing sale price to assessed value. The median levels and the equalization factors for 1999 are presented on Page 27.

By law, the median level of assessment in a county must be  $33\frac{1}{3}$  percent, that is, property must be assessed at  $\frac{1}{3}$  of its market value. When local assessing officials fail to come within 1 percent of the statutory level, the department issues an equalization factor, or multiplier, that brings the median level to the statutory requirement.

In Cook County, assessment levels for different types of property are set by the county classification ordinance. The department's equalization factor brings the overall assessment of property in Cook County to  $\frac{1}{3}$  of market value, although no class is at this level.

A  $33\frac{1}{3}$  percent median level of assessment does not guarantee fairness. For example, if half the property in a county is assessed at  $16\frac{2}{3}$  percent and half is assessed at 50 percent, the median level of assessment would be  $33\frac{1}{3}$  percent. However, on properties of equal market value, the under-assessed properties would be paying one-third the taxes of the over-assessed properties.

The COD is a statistical measure of how much the average assessment deviates from the median level, ignoring whether the parcel is under or over-assessed. The COD is expressed as a percent of the median level. In the example above, the average deviation is  $16\frac{2}{3}$  percent for both the under and over-assessed properties and the median level is  $33\frac{1}{3}$  percent, making the COD 50 percent ( $16\frac{2}{3}$  average deviation divided by the  $33\frac{1}{3}$  percent median level).

The more uniform the tax base, the easier it is to attain a low COD. A lower COD is easier to attain in an area of primarily residential property than in one that contains a mix of residential, commercial, and industrial property.

The lower the COD, the more uniform the assessment and the apportionment of the property tax burden. The department pays a bonus to assessors in counties with 50,000 or more inhabitants, but fewer than 3 million, whose CODs are 15 percent or less, and whose median level of assessment is between  $31\frac{1}{3}$  and  $35\frac{1}{3}$  percent of market value. In counties with fewer than 50,000 inhabitants, the COD must be no greater than 32 percent in 1998. For 1999 and every year after, the COD must be no greater than 30 percent. In addition, the median level of assessment must be between  $31\frac{1}{3}$  and  $35\frac{1}{3}$  percent of market value.

The second measure of assessment uniformity, the COC, measures the percentage of assessments that fall within 10 percent of the median level of assessment. For example, in a taxing district that assessed at the  $33\frac{1}{3}$  percent median level, the COC would measure the percentage of assessments that fall between 30 percent and  $36\frac{2}{3}$  percent (*i.e.*, within 10 percent of the median level).

A higher COC indicates a higher degree of assessment uniformity. Unlike the COD, the COC is not elevated by a small number of sales ratios that are far from the average. Higher COCs are more easily obtained in areas that contain similar types of property.

As the table indicates, counties with low CODs tend to have high COCs.

Table B

## Coefficients of Dispersion (COD) and Coefficients of Concentration (COC)

1998 Urban Assessments/Sales Ratios

| County     | COD (*) | Rank | COC (*) | Rank | County      | COD (*) | Rank | COC (*) | Rank |
|------------|---------|------|---------|------|-------------|---------|------|---------|------|
| Adams      | 25.06   | 25   | 38.30   | 27   | Lee         | 50.39   | 91   | 31.21   | 54   |

The equalization factor for 1999 is based on a 3-year (1996, 1997, and 1998) average assessment level, adjusted to reflect any reassessment through 1999.

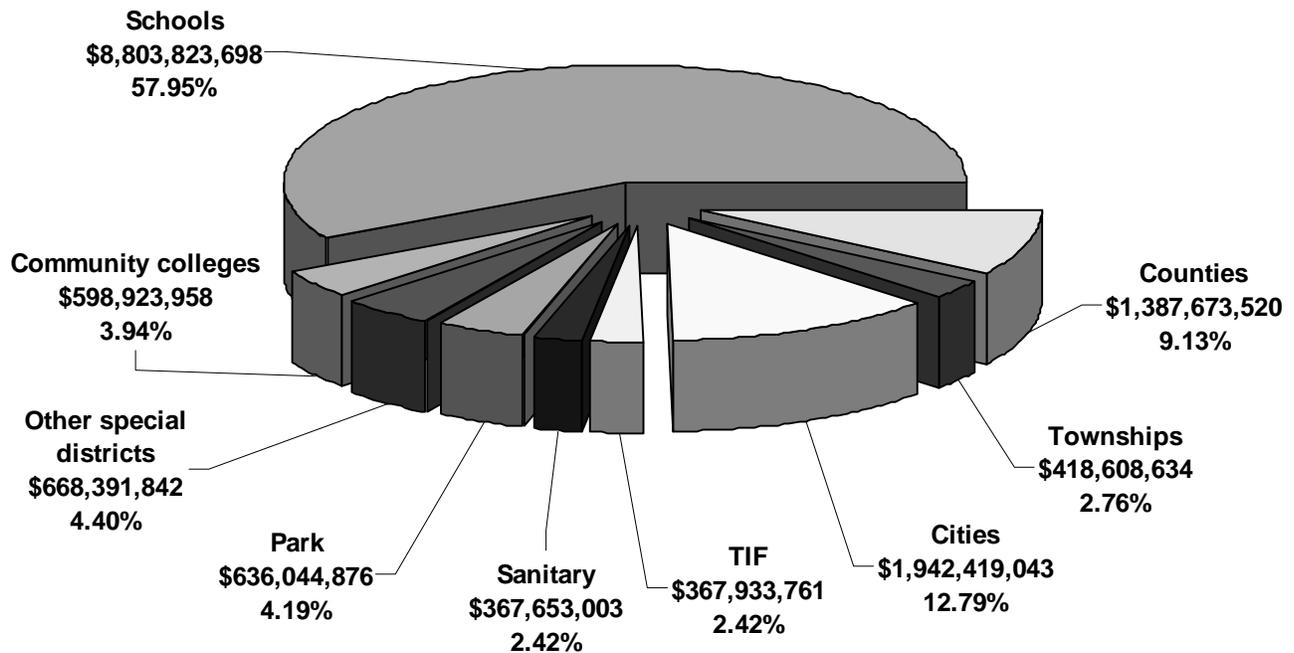

(\* A final equalization factor of 1.0000 is issued to any county whose actual level of assessment is within 1% of the required statutory level under 35 ILCS 200/17-25.

# Extensions by Class

|              |                 |            |                 |            |                         |
|--------------|-----------------|------------|-----------------|------------|-------------------------|
| Residential  | \$8,587,346,052 | Commercial | \$4,154,229,023 | Industrial | \$1,767,757,723         |
| Farm         | \$616,002,408   | Railroads  | \$59,754,984    | Minerals   | \$6,382,145             |
| <b>Total</b> |                 |            |                 |            | <b>\$15,191,472,335</b> |

# Extensions by Type of District

|              |                 |                    |               |                         |                         |
|--------------|-----------------|--------------------|---------------|-------------------------|-------------------------|
| Counties     | \$1,387,673,520 | TIF districts      | \$367,933,761 | Other special districts | \$668,391,842           |
| Townships    | \$418,608,634   | Sanitary districts | \$367,653,003 | Community colleges      | \$598,923,958           |
| Cities       | \$1,942,419,043 | Park districts     | \$636,044,876 | Schools                 | \$8,803,823,698         |
| <b>Total</b> |                 |                    |               |                         | <b>\$15,191,472,335</b> |

**Note:** TIF distributions and enterprise zone abatements have not been removed.

# Comparison Tables

---

The first seven tables are comparison tables. Each table either compares the current year to an historic year or years, or analyzes the current year by class or type of taxing district. A brief explanation of each table follows.

## **Table 1**

---

This table illustrates, by county, changes in the tax base, or EAV, and the change in taxes, or extensions, between 1998 and 1999.

## **Table 2**

---

This table reports a 22-year history, 1978 to 1999, of the statewide EAV, and the total property taxes extended. It also shows the annual change for the past 22 years.

## **Table 3**

---

This table shows property taxes extended by the various types of districts for 1998 and 1999.

## **Table 4**

---

This table illustrates a ten-year history of the number of taxing districts by type, from 1990 to 1999. Each taxing district is placed in its home county and counted once. The township category combines the township road and bridge district with the township, and counts each combination as one township. The road district category contains the road districts in commission counties.

## **Table 5**

---

This table shows the number and type of taxing districts in Illinois, by county. The total home county taxing districts category consists of the township or road district, municipalities, total schools and colleges, total special districts, and the county itself. Each taxing district is placed in its home county, by type, and is counted once, even though it may overlap into several counties. A township, and a township road and bridge district, are counted as one district.

## **Table 6**

---

This table compares the property taxes extended for schools to the total statewide property tax extensions, from 1989 to 1999. The table illustrates an 11-year history of total tax extensions and extensions for schools, including community colleges.

## **Table 7**

---

This table illustrates EAV, before exemptions, by class of property, for both local and state-assessed property.

Table 1

## Comparison of EAV and Taxes Extended, 1998 and 1999

| County                 | Total EAV         |                   |                                      |                                 | Total Extensions             |                              |                                      |                                 |
|------------------------|-------------------|-------------------|--------------------------------------|---------------------------------|------------------------------|------------------------------|--------------------------------------|---------------------------------|

# Rate Tables

---

The next three tables are rate tables. The average tax rates shown in Tables 8 and 9 are computed by dividing the extensions by the EAV and converting to a percentage. A change in the rate can result either from changes in the EAV, changes in the extensions, or both. The aggregate tax rate in Table 10 is the sum of the individual taxing districts' rates. A brief explanation of each table is below.

## **Table 8**

---

This table lists the average tax rate by county. For tax years 1998 and 1999, the average tax rate is also given by class of property. The total rate is given for the three preceding years: 1997, 1996, and 1995.

## **Table 9**

---

This table lists the average tax rates for taxing districts with a corporate or education fund. In addition, two districts are listed that have a road and bridge fund or assessing fund. The rates are calculated by dividing the total extensions for each type of district, by the total EAV for the same type of district.

## **Table 10**

---

This table reports the principal aggregate tax rate, sometimes referred to as a combination rate, for county seats and cities with populations greater than 10,000. This rate is the sum, or combination of the tax rates, of each taxing district within a specific geographical area. The rates are those that the majority of people living in a specific geographical area would pay. However, every possible rate may not be listed.

Effective tax rates and rankings are also shown. The effective tax rate shows taxes paid, expressed as a percent of the actual market value of the property, as opposed to the nominal rate, which is the rate applied to the taxable EAV. The effective tax rate used is for an owner-occupied residential property of \$100,000 market value.

To compute the effective rate, the market value of the property is multiplied by the median level of assessment for the jurisdiction. The median level for the township is from the 1999 assessment/sales ratio study, as adjusted for any 1999 reassessment. If there are insufficient sales for a separate study for the township, the median level for the "All Other" category of the sales ratio study for that county is used. In commission counties, the urban weighted average is used. This result is then multiplied by the county multiplier for 1999 to determine the EAV. The general homestead exemption maximum of \$3,500 (\$4,500 in Cook County), is then subtracted. This remainder is then multiplied by the aggregate tax rate from Table 10. The final number is then divided by the market value of the property and the result is expressed as a percent.

Table 8

## Average Tax Rates, 1995 — 1999

| County               | 1999  |             |      |            |            |          |         | 1998  |             |      |            |            |          |         | Total rate |      |      |

(1) Average rates are calculated for only those districts that have a corporate or education fund.

(2) Excludes the City of Chicago, whose rate was 1.673

(3) Average rates are based on districts that have a roads and bridges fund.

(4) Average rates are based on districts that have an assessing fund.

# Extension Tables

---

The next five tables are categorized as extension tables. A brief explanation of each table is below.

## **Table 11**

---

This table shows extensions by class of property. The residential extension includes residential lots, houses, condominiums, and apartment buildings of six units or less. The farm extensions include farmland, farm buildings, and farm homesites and dwellings.

## **Table 12**

---

This table consists of separate tables that summarize the current extensions for each type of taxing district and fund, such as townships and road districts, park districts, and elementary school districts.

## **Table 13**

---

This table lists the percentage distribution of the total property tax extended for each type of taxing district.

## **Table 14**

---

This table reports the special service areas by county.

## **Table 14A Graph**

---

This graph reports the growth in TIF districts from 1980 through 1999. In addition, the EAV for the TIF area, the total TIF extension, and the percentage increase of the TIF extension are shown for each year.

## **Table 14A**

---

This table reports all the tax increment financing (TIF) districts in Illinois. The EAV in the TIF is the growth in tax base, and the EAV increment shown is generally calculated on an aggregate basis. The total taxes extended are the tax increment funds generated to finance the public improvements associated with the TIF area. The law requires that the taxes be distributed to the TIF on a parcel-by-parcel basis.

Table 11

## Comparison of Current Taxes Extended by Class of Property

| County        | Total          | Residential %      | Farm %           | Commercial %        | Industrial %       | Railroads %    | Minerals %      |
|---------------|----------------|--------------------|------------------|---------------------|--------------------|----------------|-----------------|

# Assessed Value Tables

---

The next four tables are categorized as assessed value tables. They present a picture of the composition of the tax base for each county in Illinois, and the values after action by the CCAO, by boards of review, and by the state. A brief explanation of each table is below.

## **Table 15**

---

This table compares the EAV, by class of property, for each county.

## **Table 16**

---

This table details locally-assessed value at various stages in the assessment cycle: after the chief county assessment officer (CCAO) action, after board of review action, and as equalized by the state multiplier and reduced by exemptions. It also reports values for state-assessed railroad property and pollution-control facilities. The total equalized valuation, which includes tax increment financing distributions and enterprise zone abatements, is shown in the last column.

## **Table 17**

---

This table reports the EAV, before exemptions, of locally assessed real estate and railroad property for each county, the Cook County assessment districts, and statewide totals.

## **Table 18**

---

This table details local assessments by class, before state equalization, and before removing the exemptions. The assessed value is presented before and after board of review action.

Table 15

## Comparison of Equalized Assessed Valuations by Class of Property

(Thousands of dollars)

# Collection Tables

---

The next two tables are collection tables. They outline taxes collected as a percentage of taxes billed (extended) and the reasons for the differences. A brief explanation of the tables is below.

## **Table 19**

---

This table details the amount of taxes extended by selected class of property. The amount extended is compared to the tax collected to obtain the collection rate shown.

## **Table 20**

---

This table reports the charges against collections: protests and amounts withheld, delinquencies, certificates of error, and other charges. It then details the net collections available for distribution after these charges, plus the amount of omitted taxes. Effective December 12, 1997, no additional funds paid under protest can be withheld from distribution per Public Act 90-556.

Table 19

## Comparison of Taxes Extended and Collected by Selected Classes of Property

| County                 | Total taxes    |                |           | Real estate    |                |           | Railroad property |            |           |
|------------------------|----------------|----------------|-----------|----------------|----------------|-----------|-------------------|------------|-----------|
|                        | Extended       | Collected      | Percent   | Extended       | Collected      | Percent   | Extended          | Collected  | Percent   |
| <b>Statewide</b>       | 15,191,472,335 | 15,052,117,452 | 99.1      | 15,131,717,350 | 14,992,982,881 | 99.1      | 59,754,984        | 59,134,571 | 99.0      |

# Homestead Exemption Tables

---

The next three tables are categorized as homestead exemption tables. They illustrate the effect of tax exemptions on either the EAV or AV base. A brief explanation of the tables is below.

## Table 21

---

This table illustrates the number of general homestead exemptions granted in each county and the reduction in the EAV as a result of those exemptions. The table shows a five-year history from 1995 to 1999.

## Table 22

---

This table details the senior citizens' homestead exemption, the disabled veterans' exemption, and the homestead improvement exemption by showing the number of exemptions and either the EAV or AV reduction for each one in 1999.

## Table 22A

---

This table reports the number of exemptions, the EAV reduction, and the average exemption amount for the Senior Citizens Assessment Freeze Homestead Exemption (SCAFHE) for the 1999 tax year. This exemption was first effective for the 1994 tax year.

Table 21

## Number of General Homestead Exemptions and the EAV Reduction, 1995 — 1999

| County                 | Number of exemptions |           |           |           |           | EAV reduction  |                |                |                |                |
|------------------------|----------------------|-----------|-----------|-----------|-----------|----------------|----------------|----------------|----------------|----------------|
|                        | 1999                 | 1998      | 1997      | 1996      | 1995      | 1999           | 1998           | 1997           | 1996           | 1995           |

# Replacement Tax Tables

---

The next two tables are replacement tax tables. They detail the distribution of the corporate personal property replacement tax money to local governments. A brief explanation of the tables is below.

## **Table 23**

---

This table details a five-year history, 1996 through 2000, of the amount of personal property replacement tax allocations distributed to the eligible taxing districts in each county.

## **Table 24**

---

This table shows the amount of corporate personal property replacement tax allocations distributed by the type of taxing district for the 2000 calendar year.

Table 23

## Calendar Year Replacement Tax Allocations, 1996 — 2000

| County                 | 2000          | 1999        | 1998        | 1997        | 1996        |

# Abatement Tables

---

The next two tables are categorized as abatement tables. They detail locally approved tax abatements. A brief explanation of the tables is below.

## **Table 25**

---

This table lists the enterprise zones in each county and the abatements that were given in these zones.

## **Table 26**

---

This table illustrates the general authority abatements under 35 ILCS 200/18-165.

Table 25

## Enterprise Zones

| County                 | Name of zone                 | Equalized assessed valuation | Total abatement for 1999 | Abated extensions by type of district |         |                            |                  |                      | Year certified |
|------------------------|------------------------------|------------------------------|--------------------------|---------------------------------------|---------|----------------------------|------------------|----------------------|----------------|
|                        |                              |                              |                          | Counties                              | Cities  | Township/<br>road district | Special district | Schools/<br>colleges |                |
| Adams                  | Quincy                       | 35,142,200                   | 2,359,605                | 239,835                               | 416,643 | 57,933                     | 183,342          | 1,461,852            | 1985           |
| Alexander              | Cairo (1                     | —                            | —                        | —                                     | —       | —                          | —                | —                    | 1986           |
